The *Journal* is registered with the Copyright Clearance Center, 27 Congress St., Salem, Mass. 01970. Organizations in the USA which are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per-copy fee of $5.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022-1120/89/$5.00 + .00

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA is authorized to supply single copies of separate articles for private use only.

For all other use of material from the *Journal* permission should be sought from Cambridge or the American Branch of Cambridge University Press.

SUBSCRIPTIONS

The JOURNAL OF FLUID MECHANICS (ISSN 0022-1120) is published by the Cambridge University Press in 12 volumes each year. All orders must be accompanied by payment. Single volumes cost £38 net (US $75 in the USA and Canada) plus postage. The subscription price in the UK (which includes postage) to volumes 198–209, 1989, is £410, £450 elsewhere (US $880 in the USA and Canada) for institutions: £225 (US $450) for individuals. Copies of the journal for subscribers in the USA and Canada are sent by air to New York. Second class postage is paid at New York, NY, and at additional mailing offices. Claims for missing issues will be considered only if made immediately upon receipt of the subsequent issue. Copies of back numbers are available from Cambridge University Press. POSTMASTER: send address changes in USA and Canada to *Journal of Fluid Mechanics*, Cambridge University Press, 110 Midland Avenue, Port Chester, New York, NY 10573.

Volume 204 July 1989

CONTENTS

Scaling of hard thermal turbulence in Rayleigh–Bénard convection. Bernard Castaing, Gemunu Gunaratne, François Heslot, Leo Kadanoff, Albert Libchaber, Stephan Thomae, Xiao-Zhong Wu, Stéphane Zaleski and Gianluigi Zanetti *page* 1

Passage through the critical Froude number for shallow-water waves over a variable bottom. J. Kevorkian and J. Yu 31

Reynolds-number effects on the structure of a turbulent channel flow. T. Wei and W. W. Willmarth 57

On the foundations of generalized Taylor dispersion theory. I. Frankel and H. Brenner 97

Solitary waves in magma dynamics. Victor Barcilon and Oscar M. Lovera 121

A radiational method for water wave radiation and diffraction problems. J. A. P. Aranha and C. P. Pesce 135

Some integral theorems relating to the oscillations of bubbles. Michael S. Longuet-Higgins 159

Image processing of the near wakes of stationary and rotating cylinders. J. Massons, X. Ruiz and F. Díaz 167

A canonical statistical theory of oceanic internal waves. Kenneth R. Allen and Richard I. Joseph 185

Reverse flow in a channel with an obstruction at the entry. B. H. Lakshmana Gowda and E. G. Tulapurkara 229

Active stabilization of compressor surge. J. E. Ffowcs Williams and X. Y. Huang 245

Observations of a nonlinear solitary wave packet in the Kelvin wake of a ship. Ellen D. Brown, Steven B. Buchsbaum, Robert E. Hall, John P. Penhune, Kurt F. Schmitt, Kenneth M. Watson and Donald C. Wyatt 263

A new equation for calculating wave loads on offshore structures. R. C. T. Rainey 295

Modal exchange mechanisms in Lapwood convection. D. S. Riley and K. H. Winters 325

Structure of the turbulent flow field under breaking waves in the surf zone. Kazuo Nadaoka, Mikio Hino and Yoshiji Koyano 359

Evolution and decay of cylindrical and spherical nonlinear acoustic waves generated by a sinusoidal source. P. L. Sachdev and K. R. C. Nair 389

On the onset of three-dimensionality and time-dependence in Görtler vortices. PHILIP HALL and SHARON SEDDOUGUI 405

On the distortion of the static structure factor of colloidal fluids in shear flow. J. K. G. DHONT 421

Amplitude equations for wave packets in slightly inhomogeneous unstable flows. T. F. BALSA 433

Further experiments on the evolution of turbulent stresses and scales in uniformly sheared turbulence. S. TAVOULARIS and U. KARNIK 457

Vertical mixing due to the breaking of critical internal waves on sloping boundaries. G. N. IVEY and R. I. NOKES 479

The flow downstream of screens and its influence on the flow in the stagnation region of cylindrical bodies. J. BÖTTCHER and E. WEDEMEYER 501

Secondary flows and vortex formation around a circular cylinder in constant-shear flow. H. G. C. WOO, J. E. CERMAK and J. A. PETERKA 523

A note on complete sets of material conservation laws. JOSEPH EGGER 543

A numerical method for treating time-periodic boundary layers. P. W. DUCK 549

The superharmonic instability of Stokes waves in deep water. W. J. JILLIANS 563

Influence of thermosolutal convection on the solidification front during upwards solidification. H. NGUYEN THI, B. BILLIA and H. JAMGOTCHIAN 581

REVIEW

Low-Gravity Fluid Mechanics, by A. D. Myshkis, V. G. Babskii, N. D. Kopachevskii, L. A. Slobozhanin and A. D. Tyuptsov 598
